

Stripe & Bluevine Integration Guide

Standard Operating Procedure for Connecting Payment Keys & Payouts

System Purpose: Iron Prairie's website utilizes a dual-track payment engine: **100% Stripe Checkout** for immediate e-commerce paddle blind sales (Cards, Apple Pay, Google Pay, and instant ACH bank transfers), and **Net 30 Commercial PO / ACH** for industrial plants. Cleared funds from Stripe automatically deposit into your **Bluevine Business Checking** account every 1–2 business days.

PHASE 1: Retrieving Your Stripe API Keys

Follow these 4 quick steps inside your Stripe dashboard to locate your integration keys:

- | | |
|---------------|--|
| Step 1 | Log in to your Stripe dashboard at https://dashboard.stripe.com/login using your Iron Prairie credentials. |
| Step 2 | Confirm Live Mode: In the top-right header of the Stripe dashboard, verify that the 'Test mode' toggle is switched OFF so you retrieve production live keys. |
| Step 3 | Click on Developers in the top right menu, then click API Keys in the left sidebar (direct link: https://dashboard.stripe.com/apikeys). |
| Step 4 | Under the Standard Keys table, copy both credentials: <ul style="list-style-type: none"> • Publishable Key: Starts with pk_live_... (Click the key to copy). • Secret Key: Starts with sk_live_... (Click 'Reveal live key' and copy). <i>*Note: Stripe may send an SMS verification code to your mobile phone before revealing the secret key.</i> |

PHASE 2: Connecting Payouts to Bluevine Checking

Ensure all website sales deposit directly into your Bluevine business bank account:

- | | |
|---------------|---|
| Step A | In Stripe, click the Settings icon (Gear) in the top right → click Bank accounts and scheduling under <i>Business Settings</i> . |
| Step B | Click Add bank account and enter your Bluevine Routing Number and Account Number (found in your Bluevine app under Account Details). |
| Step C | Set your payout schedule to Automatic (Rolling daily) . Stripe will sweep cleared revenue directly into Bluevine. |

PHASE 3: Processing Fee Intelligence & Margin Protection

Industrial steel fabrication deals with large order values. Standard 3% credit card processing fees can eat heavily into your gross profit on custom burns. Below is how the website's payment structure protects your bottom line:

Payment Method	Stripe Fee Rate	Fee on \$1,000	Fee on \$10,000	Russell Keeps (\$10k)
Credit Card / Apple Pay Fast turnaround web buyers	2.9% + \$0.30	\$29.30	\$290.30	\$9,709.70
Stripe ACH Direct Debit Instant online bank transfer	0.8% (\$5.00 Max Cap)	\$5.00	\$5.00 FLAT	\$9,995.00
Direct Bluevine Wire / ACH Net 30 Invoiced Accounts	Direct Bank Transfer	\$0.00	\$0.00	\$10,000.00

■ The 3% ACH Cash Discount Strategy (Web & Email Proposals):

- **Incentivize ACH Payments:** The website and email proposals now feature an instant **3% ACH Discount** (e.g. Save \$30 on \$1,000, Save \$300 on \$10,000) when buyers pay via direct bank debit or wire transfer.
- **\$5.00 Maximum Fee Cap:** Stripe charges a flat **\$5.00 max** for ACH. Giving a 3% discount and paying \$5 saves you from eating 2.9% + \$0.30 credit card processor fees while getting cash in your account faster!
- **Email Proposal Close Engine:** Clients receiving PDF quotes from Sales@ironprairiefabrication.com are prompted to confirm their PO via ACH to lock in the 3% discount rate.

PHASE 4: Ready to Connect? Here is the Handoff Checklist

Once you have accessed your Stripe Dashboard, send the following details to Michael (UDCS):

Connection Checklist:

- [] **1. Stripe Publishable Key: pk_live_...** (Safe for website configuration)
- [] **2. Stripe Secret Key: sk_live_...** (Sent securely via encrypted channel / text)
- [] **3. Bluevine Payouts:** Confirmation that Bluevine Business Checking is linked in Stripe.

What Happens Next:

UDCS will immediately connect the API keys to the live environment, run a test transaction, and verify that paid orders automatically route straight to the **Iron Prairie CNC Plasma Shop Floor Board** with certified ASME MTR travelers.
